主要研究方向	<p>(1) Human Resources Development and Management (2) Organizational Behavior and Corporate Culture (3) Marketing Management (4) Strategy for Enterprise Development (5) Management Information and System (6) Corporation Finance</p>
学习年限与学分	<p>The education system for international students in the professional master degree program is 2 years. The years of study is generally 2-3 years and the longest is no more than 3 years. The credit system is carried out during the academic study period, and the total credits are no less than 39, including 25 credits for required degree courses, 11 credits for discipline elective courses, 1 credit for interdisciplinary elective courses and 2 credits for compulsory courses. The compulsory courses include 1 credit of academic activities and 1 credit of thesis proposal and mid-term assessment.</p>
实践环节	<p>During school years, foreign students should investigate at least three units (enterprises, financial units and departments of government, etc.). Before writing thesis, students should carry out investigation on the areas of their selected topics, and put the results of investigation into their thesis proposal reports. Postgraduates should take part in the activities organized by their advisers, e.g. enterprise diagnosis, area development, industrial development consultation, etc.. The time for practical operations is 40-50 hours.</p>
选题报告及中期考核	<p>2) For thesis proposal, master degree international students should generally combine the research area and the</p>

	research project of the supervisor, and choose a topic with theoretical significance or application value for the needs of national economy and social development. Factors such as the category, knowledge structure, work ability and years of study of professional master degree international students should be considered when determining the content and workload of the dissertation work. The master degree students must participate in the mid-term assessment of the school. The specific requirements for thesis proposal and mid-term assessment shall be implemented in accordance with the postgraduate handbook Wuhan University of Technology Postgraduate Midterm Examination and Implementation Measures.
科研与论文	During the school years, all the students should actively write and put forward papers on their fields or their related fields in Chinese or foreign academic publications or academic conferences, and should also take active part in research tasks undertaken by their supervisors. The topic of master's degree thesis should be of theoretic significance or important application prospects. The combination of theory with practice and quality with quantity should be embodied in academic theses. The related research situations at home and abroad should be summarized in the thesis, and the reference documents listed at the end of the thesis should be no less than 40 pieces.
培养方式与方法	The training of master degree international students adopts the guidance method of the supervisor-responsible system or the supervisor-oriented steering group. The training methods should be flexible and diverse, and more heuristic and deliberative teaching methods to demonstrate the leading role of the supervisor.
考核
